

T-SHIRT TOTE BAG

A great way to upcycle
your favourite T-shirt if
it gets damaged.

You'll need:

★ An old T-shirt

2

Cut the neckline so it is scooped – you
could use a plate as a template.

Turn your T-shirt inside out and cut the sleeves off. If
you are using a tank top, you won't have to do this.

3

Cut slits 2 cm apart and 10cm long from the bottom up. You could use some eco tape to mark where to cut to.

4

Align your slits in pairs, front to back, tie each pair together in a double knot. Turn your bag inside out and it's ready to use. To have feature tassels, don't turn it inside out!

You could pick a plain T-shirt to use or one with a cool pattern!
